

```
1. root@granite2:~# ps | grep sh
2.   1559 root      4532 S    /usr/sbin/sshd
3.   1595 root      3076 S    -sh
4.   3361 root      2696 S    grep sh
5. root@granite2:~# ls -l /proc/1595/fd
6. lrwx-----  1 root    root          64 Aug 10 00:21 0 -> /dev/ttyS0
7. lrwx-----  1 root    root          64 Aug 10 00:22 1 -> /dev/ttyS0
8. lrwx-----  1 root    root          64 Aug 10 00:22 2 -> /dev/ttyS0
9. lrwx-----  1 root    root          64 Aug 10 00:22 255 -> /dev/ttyS0
```

解释了在LSP board上的运行的application的input / output都指向 `/dev/ttyS0`
